Wall spikes used on wood fence

## Accessories

The fixing of wall spikes needs bolts. And generally, there are three kinds of bolts: screw bolts, expansion bolts and anti-theft bolt. Screw bolts are usually used on the wooden fence. Expansion bolts are suitable for block wall installation and anti-theft bolts are typically used on plates the installations.

Expansion Bolts

Screw bolts

Anti-theft bolts

## Installation

The installation of wall spikes is very easy. You just need to punch holes and use the bolts to fix the spikes. And before installation, please note the size of the holes must same as the holes of the spikes bottom.

- Step 1: clean the topping of the wall or fence.
- Step 2: punch holes on topping of fence.
- Step 3: put the wall spikes on top of fence.
- Step 4: screw the bolts tightly.
